Known for consistently delivering tailored technological solutions that meet clients' needs and drive business success. Skilled in database development, user interface design, backend implementation, code writing and testing, and effective issue troubleshooting.

EXPERIENCE

SOFTWARE ENGINEER

PennyCanny | Islamabad

2022 - PRESENT

- Developed and maintained a dynamic WordPress blog website for the company, driving online engagement and brand awareness.
 - Innovated by integrating third-party APIs, designing intuitive user interfaces, and leveraging Google Cloud Portal and AWS to enhance functionality and deliver a seamless user experience.
 - Spearheaded the implementation of cutting-edge backend features using JavaScript, expertly transitioning the codebase to TypeScript. Streamlined development processes by merging the backend with the frontend in a monorepo setup.
 - Demonstrated exceptional bug tracking and resolution skills, ensuring high-quality software by conducting rigorous testing, debugging, and proactive issue management.
 - Developed new interfaces with modern JavaScript libraries, which enhanced the user satisfaction. - Identified multiple bugs and fixed those bugs which enhanced the user interaction.
 - Modification in API integration with Front End which greatly improved the user interactions.
 - Exposure to more advanced concepts of Web Development and integration of different kinds of technologies in React Application.
 - Collaborated closely with the experts to learn and provide advanced concepts of Web Development.
 - Automated the system to scrap the data from various sources to provide the latest coupons.
-

PROJECTS
